Plant Transformation Technologies II

International Conference
February 19-22 2011, Vienna, Austria

The Programme of Plant Transformation Technologies II combines plenary lectures, poster sessions, and tours of the beautiful city of Vienna. Approximately 250 participants are expected, including more than 35 speakers and many presentations selected from abstracts.

Vienna is old, Vienna is new – and so varied: from Gothic St. Stephen's Cathedral to the Imperial Palace, from magnificent Baroque buildings to "golden" Art Nouveau of the Secession. More famous composers have lived here than in any other city – in Vienna, music is literally in the air: Waltzes and operettas have their home here. Record-breaking: In Vienna, there are over 27 castles and more than 150 palaces

Invited Speakers

- Ralph Bock (Germany)
- Marc Boutry (Belgium)
- Paul Christou (Spain)
- Vitaly Citovsky (USA)
- Stanton B. Gelvin (USA)
- Huw D. Jones (UK)
- Lan-Ying Lee (USA)
- George Lomonossov (UK)
- Marc van Montagu (Belgium)
- David W. Ow (China)
- Neal Stewart, Jr. (USA)
- Antony Trewavas (Scotland)

We are looking forward to abstracts addressing the following topics:

- Agrobacterium Mediated Plant Transformation
- Particle bombardment and Other Transformation Methods
- Explants used for Plant Transformation
- Transformation of Important Crops
- Plant Transformation Tools: Genes, Vectors, Promoters etc
- Selectable and Screenable Markers
- Molecular Analysis of Transformants
- Expression of Transgenes in Transgenic Plants
- Marker Excision and Marker Free Trans technologies
- Plastid Transformation and Biotechnology
- Transgenic Plants as Bio Factories
- Transgenic Plants and Public
