Plant Genetics and Breeding Technologies

International Conference

February 18-20th 2013, Vienna, Austria

International Conference "Plant Genetics and Breeding Technologies" to be held in Vienna on February 18-20th, 2013 will provide leading academy and industry scientists a platform to communicate recent advances in Plant Genetics and Breeding Technologies and an opportunity to establish multilateral collaborations.

Approximately 300-350 participants are expected to attend this exciting scientific forum including almost 40 lectures delivered by worldwide known invited speakers and young, talented speakers selected from submitted abstracts.

Vienna is located in the heart of Europe on the banks of the Danube River, and considered one of the most important economic, cultural and touristic large cities of central Europe. Apart from providing top science, the Conference will capture the spirit of the city thanks to the central location of the venue, offering a multitude of cultural events just minutes away.

Invited speakers:

Chen Z J (USA)

Edwards D (Australia)

Feuillet C (France)

Graner A (Germany)

Parry M A (UK)

Wang J (China)

Waugh R (Scotland, UK)

Koorneef M (Germany-The Netherlands)

Dirks R (The Netherlands)

Röder M S (Germany)

Schreiber F (Germany)

Tuberosa R (Italy)

van Eeuwijk F (The Netherlands)

Visser RG (The Netherlands)

Conference covers following topics:

- Plant Genetic Resources, Natural Variability, Heterosis
- Plant Genetic Populations and Population Genetics
- Polyploidy in Plant Genetics and Breeding
- Haploids and Doubled Haploids in Plant Genetics and Breeding
- Molecular Breeding tools: "Omics" and Arrays
- Molecular Markers and Marker Identification Technologies
- Mapping of Plant Genes and Map Based Cloning
- Genomics Assisted and Marker - Assisted Breeding
- Molecular Plant Breeding
- Genetics and Breeding of Quantitative Trait Loci
- Modelling and Simulation of Plant Genetics and Breeding
- Genotype-to-Phenotype Modelling
- High-throughput Plant Phenotyping
- Breeding for Important Traits
- Emerging New Technologies & Innovative Breeding
- Enabling Technologies: Apomixis, Male Sterility, Self Incompatibility
