

Green Plant Breeding Technologies

International Conference
February 2-5 2010, Vienna, Austria

Organizers:

Dr. Alisher Touraev (Austria)
Prof. John Snape (UK)

Vienna University of Economics

AudiMax Lecture Hall
www.vipca.at/greenbreeding/

The Programme of **Green Plant Breeding Technologies** combines plenary lectures, poster sessions, and tours of the beautiful city of Vienna. Approximately 500 participants are expected, including more than 35 speakers and many presentations selected from abstracts.

Vienna must rank among the most beautiful baroque capitals in Europe. A city of waltzes and whipped cream, high culture and coffeehouse culture, it is an alluring, romantic place. As a former imperial city, Vienna has a vast cultural heritage spanning medieval times to the present day. Top attractions include the Gothic St. Stephen's Cathedral, baroque imperial palaces and mansions and the magnificent Ring Boulevard with the State Opera, Burgtheater (National Theater), Votive Church, City Hall, Parliament and the Museums of Fine Arts and Natural History. The former imperial residences Hofburg and Schönbrunn also offer the opportunity to follow in imperial footsteps.

Invited Speakers

Christine D. Chase
Deborah Charlesworth
Rob Dirks
Alisdair R. Fernie
Elisabetta Frascaroli
Hartwig Geiger
Maarten Koorneef
June B. Nasrallah
Rebecca J. Nelson
Peggy Ozias-Akins
Georges Pelletier
Benjamin Stich
John R. Stinchcombe
Jens Weyen

We are looking forward to abstracts addressing the following topics:

Doubled Haploids in Plant Breeding
Molecular Markers in Plant Breeding
Gene Mapping in Plant Breeding
Quantitative Genetics and Plant Breeding
Marker Assisted Selection
Crossing Barriers: Male Sterility
Crossing Barriers: Self Incompatibility
Plant Genetic Resources, Natural Variability
Genotype x Environment Interactions, Heterosis
Alternative Breeding Technologies
Breeding for Physiological and Morphological Traits
Breeding for Resistance to Diseases
Asexual Reproduction in Plant Breeding
