The Programme of Molecular Aspects of Plant Development combines plenary lectures, poster sessions, and tours of the beautiful city of Vienna. Approximately 500 participants are expected, including more than 35 speakers and many presentations selected from abstracts.

As a European city that combines beauty and charm with culture, style and sophistication, Vienna is sure to impress even the most discerning first-time visitor. Mixing the traditional elegance of central Europe with all the necessities of modern twenty-first-century living, it's a thoroughly cosmopolitan city that offers a friendly, laid back atmosphere, ornate buildings, funky night-spots, and wondrous Viennese coffeehouses!

## **Invited Speakers**

Philip Benfey  
Thomas Berleth  
Dominique Bergmann  
Peter J. Fleming  
Charles S. Gasser  
Ueli Grossniklaus  
Michael Holdsworth  
Hong Ma  
Lars Ostergaard  
Venkatesan Sundaresan  
Miltos Tsiantis  
Sacco de Vries  
Virginia Walbot

## **We are looking forward to abstracts addressing the following topics:**

Seed Development, Dormancy and Germination  
Plant Organ Development (Shoot, Root, Leaf)  
Making Plant Flower  
Modelling and Systems Biology of Plant Development  
Plant Male Gametophyte Development  
Plant Female Gametophyte Development  
Plant Zygotic Embryogenesis  
Plant Somatic Embryogenesis and Regeneration  
Hormones and Plant Development  
Signaling in Plant Development  
Plant Cell Fate, Totipotency, Lineage and Polarity  
Epigenetics and Plant Development
